

## Overview

When a warehouse management system (WMS) is too much, Savant ADC provides small and mid-market companies with a scaled down version of Savant's robust WMS solution. Unlike most automated data collection (ADC) solutions that have evolved from technology integrators with often little or no industry expertise, Savant ADC was developed by supply chain professionals who have worked with global distribution and manufacturing companies in the design and implementation of warehouse automation.

Savant ADC decreases manual operations, eliminates paperwork and reduces operational costs by increasing the accuracy and speed of warehouse functions like receiving, putaway, inventory counts, inventory moves, picking and shipping. By improving operational efficiencies, Savant ADC enables your organization to gain a real competitive advantage.

**Savant ADC  
provides simple  
WMS capabilities  
at an affordable  
price!**

For small and mid-market companies, cost and time are serious concerns when implementing a new automated solution. Savant ADC has multiple pricing models to fit every budget. It is also easy to install, easy to configure and easy to use. Your warehouse staff will be up and running quickly with minimal disruption to your daily operations.

You also have the entire Savant Software team working with you to insure that your business goals and objectives are met. Savant provides a wide variety of solutions and services so your investment in Savant provides a gateway into a long term partnership as your business experiences future growth.
